Important information and things you should not forget !

➤ Electricity supply

Macedonia has between 220 and 240 volts electricity supply, 50Hz. The power sockets are of type F, 2 round pins. This socket also works with plug C and E. For multi-voltage appliances (laptop, etc.) you will need a plug adapter.

➤ Exchange office

Macedonia has its own currency (denars). It is very important to you to convert the money into denars, so you can make payments anywhere. (There is a fixed exchange rate, which 1 € is around 61,5 denars).

After arriving at the airport, the nearest exchange office is in arrivals hall – International currency exchange – Macedonia.

On the other hand, you can change your money in any bank.
